MA Granite Kitchen Brochure

Design & Manufacture

Welcome to MA GRANITE AND MARBLE WORKS

We are proud to offer an honest personal service with 18 years experience in design knowledge and manufacture of fire places with a related range of quality products. We can distribute to any part of UK, and our satisfaction guarantee enables us to offer a level of service many companies aspire to, but few reach.

We have adopted a flexible approach to the market, we expect some clients to be interested in only certain sections, i.e. kitchen worktops, splash backs, bathroom vanity tops or perhaps you will have a fire surround design of your own. Whatever your requirement may be, we can produce your design to your unique specifications in whichever colour of marble, granite or limestone you may choose. Everyone has different tastes!

Appearance of a stone fire surround will enhance any room, whether period or modern, in town or country, and be a centre piece of attraction to the whole family.

All work is carried out by own trained craftsmen at our modern factory with traditional skills. To ensure your marble, granite and stone is properly fitted we offer a complete installation service

KITCHENS

M. A. Granite & Marble Works offer a range of kitchen countertops in granite that would enhance the appearance of any kitchen.

Why choose granite?

Granite is durable and easy to look after. It is superior to other materials in that it will not warp, crack or fade and requires little maintenance, however, it should be treated at regular intervals.

Granite is a natural element which is subject to colour variations. This makes it unique as no two slabs are identical.

Granite is scratch resistant, heat resistant, stain resistant, and resistant to weathering, which makes it the perfect material for outdoor accessories. Granite is one of the most cleanable countertop materials, and also one of the most hygienic.

Granite is stylish, beautiful and practical and is a financial investment and asset in your home.

LAPITEC

LAPITEC, MORE THAN JUST STONE

This is a revolutionary high performance, engineered stone developed and manufactured by Breton S.p.A in Italy. Lapitec surfaces are pore-free, so they do not absorb liquids. This makes them stain-free, hygienic, easy to clean, and repel both bacteria and mould. Lapitec can be used for fireplaces, bathrooms, kitchen work tops and work surfaces.

LAPITEC IS:

- Weatherproof
- Acid-resistant
- Resistant to acids, bases and solvents
- Hard wearing
- Impact resistant
- Non-flammable
- Thaw and frost resistant
- Insensitive to UV rays
- Ideal for kitchens, bathrooms and fireplaces
